SCALING DATABASE SYSTEMS

Praktomat

Winter Term 2026/27 · Chair of Scalable Database Systems
Prof. Dr.-Ing. Stefanie Scherzinger · Stefan Klessinger · Christoph Köhnen

1 Accessing Praktomat

Praktomat is only accessible from within the University of Passau's network. To access Praktomat from outside the university network, you need to set up a VPN connection[1].

Report any technical problems that are not described in the documentation and may be relevant for other students in the Stud.IP forum.

Access Praktomat at `https://praktomat.sdbs.fim.uni-passau.de`.

2 Interacting with Praktomat

Figure 1 shows the Praktomat home page. It lists all courses that are currently active in Praktomat together with their corresponding Praktomat instances. Choose the course "Scaling Database Systems" in "Wintersemester 26/27".

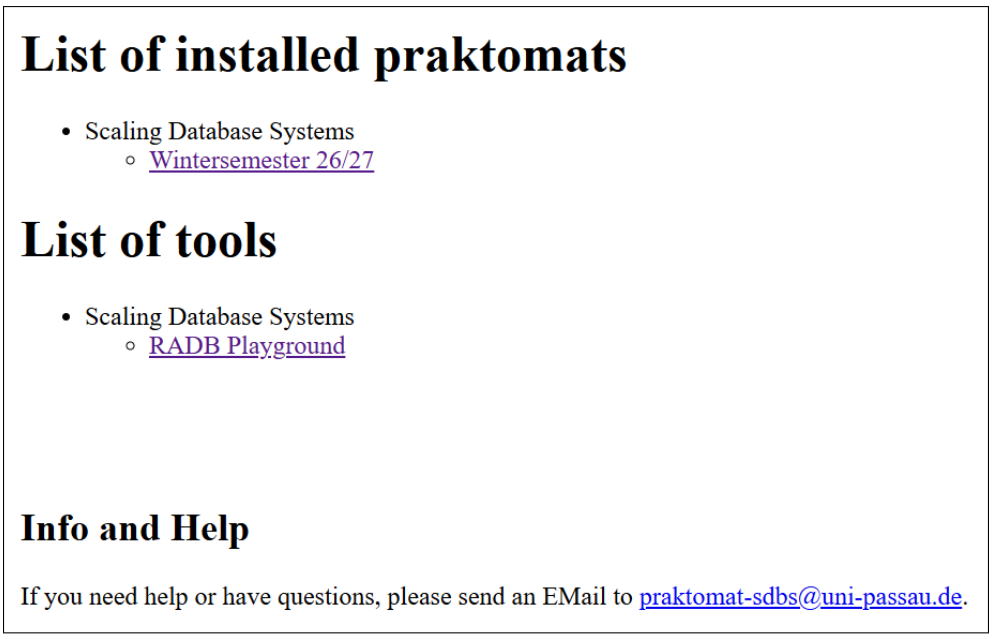

Figure 1: List of instances available in Praktomat.

Selecting the instance opens its login page (see Figure 2), where you can log in or register.

Praktomat is not integrated with the university's authentication system. Therefore, you need a separate Praktomat account. **Each Praktomat instance has its own user accounts.** Even if you already have an account for another (e.g., older) instance, you must register again for the instance used in this course.

If you have not yet registered for this instance, click *Register* (highlighted in red in Figure 2) and follow the instructions in Section 2.1. Otherwise, log in using your username and password for this instance (highlighted in green in Figure 2).

[1] More information on VPN access can be found here: `https://www.hilfe.uni-passau.de/en/eduvpn`.

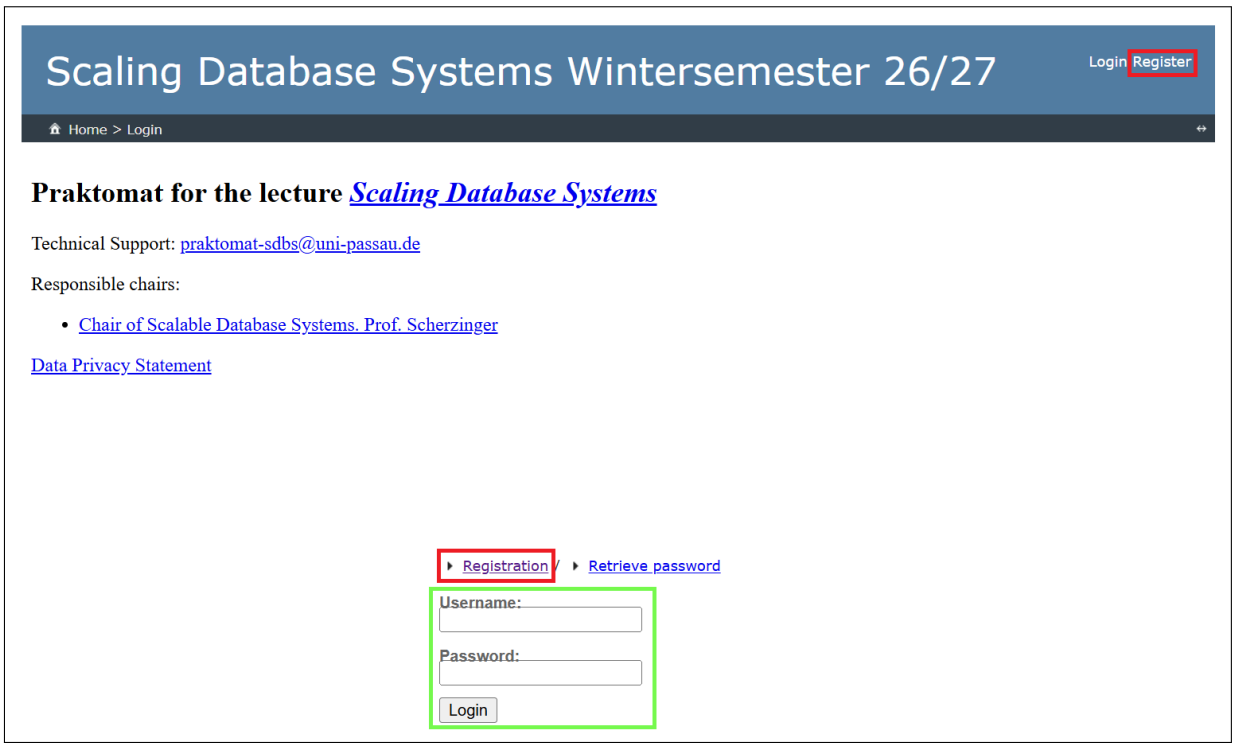

Figure 2: Login page of Praktomat.

2.1 Registration

To register for Praktomat, enter your username, first name, last name, email address, matriculation number, password, and password confirmation (see Figure 3). All fields are required.

Note: Only email addresses of the form "`<ZIM-name>@ads.uni-passau.de`" are accepted.

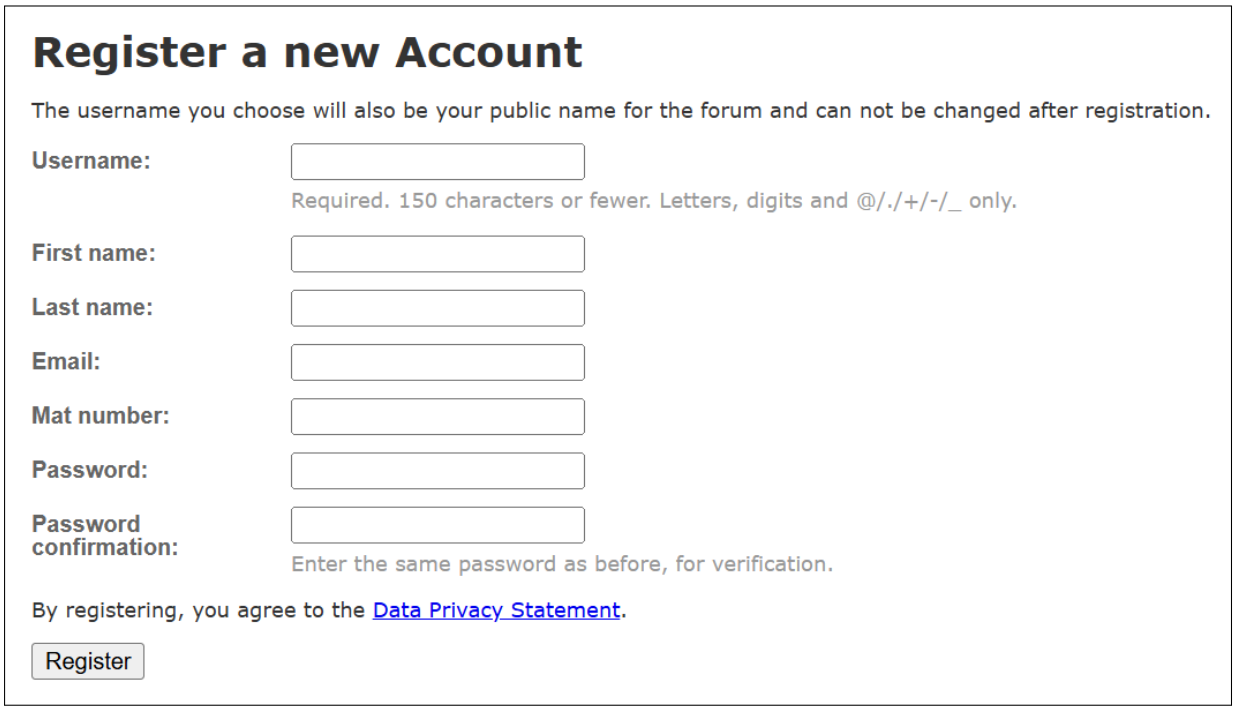

Figure 3: Registration form of Praktomat.

After clicking *Register*, a confirmation email will be sent to the address you provided. The email contains an activation link. If you do not receive it, check your spam folder. Click the activation link to activate your account.

When you log in for the first time, you will have to accept a disclaimer that includes the declaration of authenticity and the data privacy statement.

2.2 Exercises

After logging in, you will see the available exercises (highlighted in green in Figure 4). The submission deadline for each exercise is displayed below its title. **Submissions are no longer possible after the deadline.** Submissions by other means, such as email attachments or printed copies, are not accepted.

Praktomat automatically checks your submissions but does not assign grades for these exercises. Therefore, you can ignore the *Result Overview* section (highlighted in red in Figure 4).

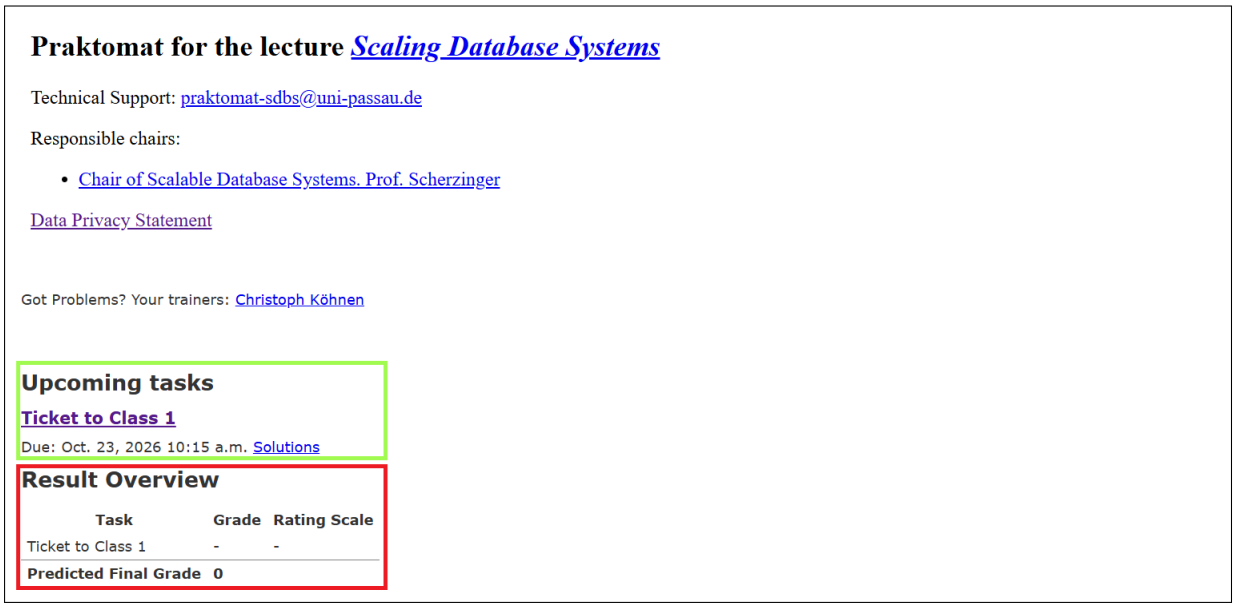

Figure 4: Overview page of exercises.

2.2.1 Exercise Details

Clicking on an exercise reveals its details (see Figure 5). The submission deadline (highlighted in red) is displayed again next to the exercise description (highlighted in black). Click *My Solutions* (highlighted in green) to view your previous submissions and upload a new solution.

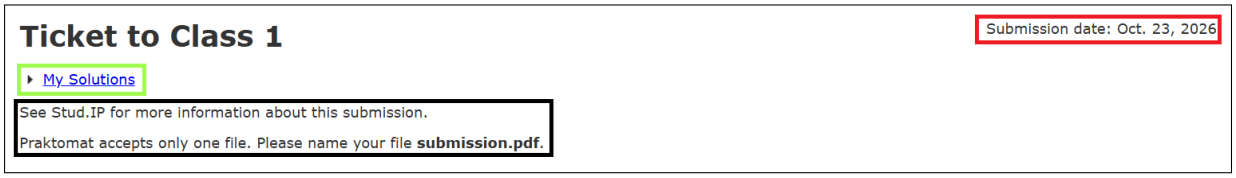

Figure 5: Exercise details.

2.2.2 Exercise Submission

Figure 6 shows the submission page. On the right (highlighted in red), you can see your previous submissions (*Solution History*) and your current *Final Solution*.

To upload your solution, use the panel on the left (highlighted in green). Click *Choose File* to select the file you want to upload. If an exercise allows multiple files, use the + and - buttons (highlighted in green) to add or remove file-selection fields. The exercise description specifies the required filename. **Make sure to use this exact filename when uploading your solution.** Click *Upload* (highlighted in green) to submit your files. Praktomat checks them immediately.

You can submit new versions as often as you like before the deadline. The *Final Solution* is your most recent submission that passed all required tests. If you submit another solution that fails the tests, your previously accepted solution remains your *Final Solution*.

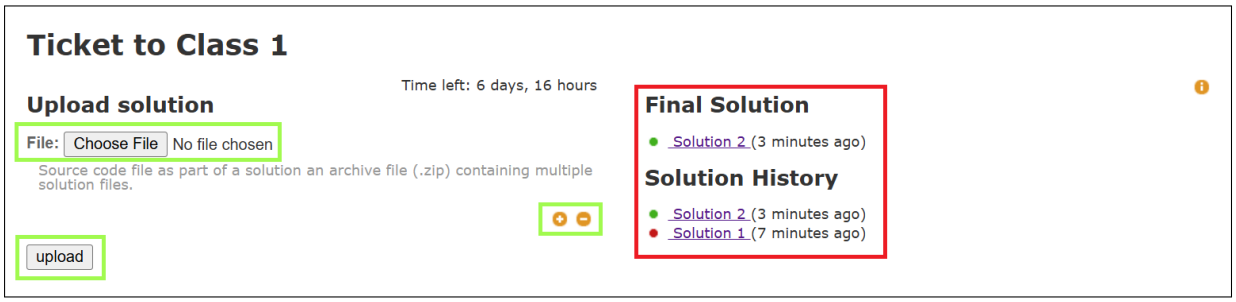

Figure 6: Exercise submission.

2.2.3 Submission Check

Praktomat accepts a submission if it passes all required tests (see Figure 7).

Figure 7: Exercise accepted.

If your submission fails at least one required test, Praktomat rejects it and displays the reason (highlighted in red in Figure 8). In this example, the uploaded file does not match the required filename `submission.pdf`.

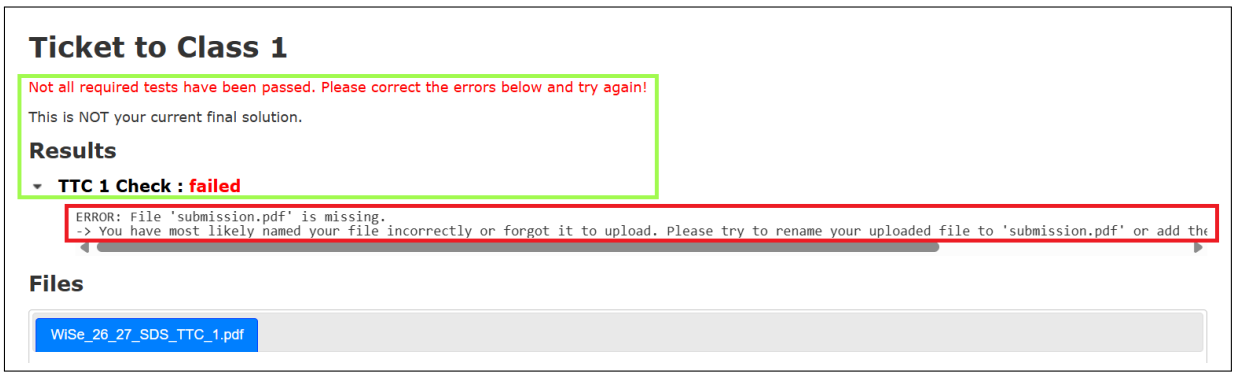

Figure 8: Exercise rejected.
